True floor level beds

Human Care's electric floor level beds provide both a safe and convenient way of taking care of patients and residents in hospitals and nursing/long-term care facilities. Placed at a true floor level, they provide vital care for those who may be at risk of falling out of a bed. When raised, they offer an optimal, ergonomic working height for caregivers.

FloorLine-i Plus

Floor-level-bed for hospital environment

- A complete management solution
- Height adjustable to an optimal working height
- Built-in technology allows for future upgrades

The aesthetically appealing FloorLine-i Plus is a complete care management solution. With its extensive range of features such as trendelenburg, cardiac chair position and electronic CPR function, this bed offers our highest level of care. With its open bus digital control box it is also possible to easily add future upgrades and accessories.

The FloorLine-i Plus is the perfect solution for preventing fall injuries. Its minimum height from the floor is just 10 cm (3.9"). At the same time, no compromises are made for caregiver safety as it raises to an excellent ergonomic working height of 80 cm (31.4").
